RAJENDRAN LIVINGSAN

Software Engineer | AI & LLM Developer | Full-Stack Development
Colombo, Sri Lanka | 0743113022 | rlivingsan@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Engineering graduate with a Bachelor of Information Technology (Honours), specializing in Software Engineering. Experienced in developing full-stack web applications, RESTful APIs and AI-integrated systems using React, TypeScript, Node.js, Spring Boot and Python. Developed five full-stack applications incorporating locally hosted LLMs, AI-assisted features and RAG-based Systems. Hands-on experience with JWT authentication, role-based access control, Docker and CI/CD automation using GitHub Actions. Seeking a Software Engineer role to contribute to reliable, maintainable software solutions.

CORE COMPETENCIES

Languages: Java, Python, TypeScript, JavaScript, SQL
Frontend: React, Vite, Tailwind CSS, HTML5, CSS3
Backend: Spring Boot, Node.js, Express, FastAPI, Flask, Django
AI / LLM: Ollama (Llama 3.2, Mistral), RAG, LangChain, ChromaDB, prompt engineering
Databases: MongoDB, MySQL, SQLite
DevOps and tools: Git, GitHub Actions, CI/CD, Docker, Maven, Postman, IntelliJ IDEA, VS Code
Engineering: REST APIs, JWT authentication, RBAC, OOP, MVC, data structures and algorithms, software testing

SELECTED PROJECTS

LIV Edu: AI-Powered Learning Management System | *React, Vite, Tailwind CSS, FastAPI, MongoDB, ChromaDB, Ollama (Llama 3.2)* | https://github.com/Livingsan/Liv-Edu-Learning-System.git

- Built a learning platform with course enrollment, materials, progress tracking and lecturer course management.
- Implemented RAG document question-answering using ChromaDB and a locally hosted Llama 3.2 model.
- Integrated AI-assisted quiz generation and PDF summarization.
- Developed backend APIs and authentication to support different user roles.

LIV Pos: AI-Powered Point of Sale and Inventory Management System | *React, TypeScript, Java 21, Spring Boot, Spring Security, MongoDB, JWT, Ollama* | https://github.com/Livingsan/Liv-pos-system.git

- Built a full-stack POS application with barcode-based product search, checkout calculations, discounts and digital receipts.
- Implemented stock monitoring, multi-branch inventory management and stock transfers.
- Integrated a locally hosted Ollama model for demand forecasting and reorder recommendations.
- Secured the backend with Spring Security, JWT authentication and role-based access.

Liv TaskFlow: AI-Enhanced Task Management System | *React 19, TypeScript, Node.js, Express, MongoDB, Docker, GitHub Actions, Ollama* | https://github.com/Livingsan/Task-management.git

- Developed a task and project platform with Kanban boards, subtasks, milestones, progress tracking and deadline notifications.
- Integrated a locally hosted Ollama LLM for task breakdown and priority recommendations.
- Implemented JWT authentication, password hashing and role-based access control.
- Containerized with Docker and automated CI/CD with GitHub Actions.

LivCare: Doctor Appointment Booking System | *MongoDB, Express, React, Node.js, JWT, bcryptjs |* https://github.com/Livingsan/livCare-booking-system.git

- Developed a MERN healthcare application with patient, doctor and administrator dashboards.
- Built doctor discovery by specialization, experience and consultation fees, plus appointment booking and status management.
- Implemented JWT authentication, password hashing and role-based access.

AI Fitness Coach: Personalized Fitness Planning System | *React, Vite, Tailwind CSS, Flask, MongoDB, Ollama, Recharts |* https://github.com/Livingsan/AI-Fitness-System.git

- Generated personalized seven-day workout plans and meal recommendations using locally hosted AI models.
- Built progress charts and analytics, with a safety filter for risky chat inputs.

Other projects:

- LIXNLEE E-Commerce Platform (PHP, MySQL) | LIV Hotel Management Desktop System (Python, Tkinter, SQLite, Django) | Fitness App UI/UX Design (Figma)

EDUCATION

Bachelor of Information Technology (Honours), Specialization in Software Engineering
ESU UNI, Colombo, Sri Lanka | 2022-2026

High School Diploma Jun 2013 – Oct 2020
D. S. Senanayake College, Colombo, Sri Lanka

COURSES & PROFESSIONAL DEVELOPMENT

- **Microsoft Learn (Nov 2026):** Develop an AI Agent with Microsoft Agent Framework; Plan an AI Agent Solution; Discover Azure AI Agents with A2A; Work Smarter with AI; Build a Real-Time Event-Driven Java Solution in Azure; Containerize and Deploy a Java App to Azure

- **SoloLearn (Oct-Nov 2026):** Python Developer; Java Intermediate; Introduction to LLMs; Machine Learning for Beginners; Generative AI in Practice; Agentic Workflows

LANGUAGES

English (professional working proficiency) | Tamil (native) | Sinhala (conversational)
